29.     <p>One of the problems with the current layout is the
navigation. For one thing it doesn't have a different option for mobile devices.
It also has the problem of causing the main text to move when the dropdown is
out. To fix these problems I enabled a hamburger menu for mobile devices and
simplified the navigation by getting rid of the dropdown and moving contact to
the bottom of every page.</p>↵
30.     <p>Another Problem with the website is that it has two
different background pictures that it uses which can be a lot to look at. To fix
this I removed the background picture from the main to make it easier to read
what is being said. However, while the body background image isn't there, that's
because I couldn't get access to it not because I think it should be removed.
